

PRESS RELEASE about the conference

**"THEORY OF TIME ASTROPHYSICS NA KOZYREV AND INTERACTION
WITH THE INFORMATION SPACE",**

Moscow, Russia,

November 25-26, 2017

Is it possible, within the framework of one scientific and practical direction, to successfully develop so far from each other topics as Russian cosmism, information aspects of metabolism in humans and animals and the lost secrets of the ancients? It would seem, no. And if it is possible, the direction should be exceptionally deep and deep.

This is the direction that originates in the writings of Leonardo da Vinci and Michel Nostradamus, continued with the studies of Albert Einstein and Nikola Tesla. In modern history, their followers were V.P. Kaznacheev and N.A. Kozyrev, in whose honor the Mirrors of Kozyrev-Kaznacheev named mysterious artifacts that do not give rest to scientists. Perhaps, the discoverers of these mysterious "Mirrors" were the philosophers of Ancient India, whose views will be told at the International Scientific and Practical Conference, the same name of the direction of this pioneering research - **"Time Theory of Astrophysics, NA Kozyrev and Interaction with the Information Space."**

Scientists - doctors and candidates of sciences will speak at the conference. Researchers and experimenters from Moscow and Moscow region, St. Petersburg, Astana, Yerevan, Stavropol, Saratov. The subject of their interest and discussion will be the questions posed to humanity by the ever-widening Reality of the Unknown from year to year. Their relevance is beyond doubt.

The formation of the noosphere, taking place before our eyes and with our direct participation, the enrichment of civilization from the time forgotten by ancient knowledge and skills, to their return in scientific use and everyday practices - as, indeed happened with the Kozyrev-Kaznacheeva Mirrors.

For researchers and experimenters working on the "front line", the recent mysterious technologies of immersion in special (altered) states of consciousness, explained by superweak interactions, the impact of the energy form on physiology and human consciousness, are already quite commonplace.

Both are the result of interaction with the Information Space, which occupies an increasing place and plays an increasing role in the new information paradigm, which is increasingly pressing the previous energy one. By including the Information Space in the habitat of our biological species, we are confronted with urgent issues of information security. They are also in the focus of attention of the conference participants.

To unravel the riddles of nature, to protect civilization from the new threats that may come along with the new era and to put into its service astounding amazing phenomena - this is the true goal of the researchers gathered for their second International Conference. And they have had undoubted successes! The "Kozyrev-Kaznacheeva Mirrors" have long been working on improving people. Their strength helps to return to normal - its natural norm. On the basis of "Mirror" in LLC "Sfera" within the framework of the humanitarian project "Mega Galaxy" bioenergy information harmonizers were created. They serve to interact with the Information Space, and are used to harmonize the human body, as well as improve the efficiency of instrumental measurements of information flows.

This work has been going on for 12 years. During this time, it was possible to significantly supplement the ideas about the structure of man coming from a deep antiquity, thus clarifying knowledge of its field nature. And again, the extracted knowledge allowed to find new methods of strengthening the creative potential, human health and normalization of our life.

It remains to be said that the Conference will be held in Moscow, on November 25 and 26, 2017. During the first day, the participants and guests will be hosted at the Great Conference Hall of the Moscow Chamber of Commerce and Industry at the address: Petrovka, 15. Registrations will be done from 9.30 to 10.00.

The Practical part for the participants (on individual invitations) – will be held on November 26, from 11.00 to 19.00, at Moscow, ul. Tourist, 33, Building 1, in the premises of the Center for Integrated Wellness Technologies (CIOT) "Sphere".
